

**ALKALINE DEGREASER  
FOR RE-BURNED FATS**

Extraordinarily strong degreaser, it easily dissolves any type of dirt, including carbonized grease. Indicated for cleaning and degreasing stainless steel grill plates, grills, extraction hood filters and other elements of kitchens and food industries that have traces of very dried or very burned fat.

DISARP,S.A. provides individualized solutions to reduce time and costs in the tasks of professional cleaning.

### Applications

Exclusive professional use. Suitable for use in the food industry. Its use is especially indicated in industrial kitchens, hotels, smoke factories, canning industry, food industry, etc.

### How to use

Exclusive professional use. The product is used pure and can be used both, hot and cold, although its effectiveness increases with temperature. The best thing to do is to dose it on the slightly hot grill, remove the residue from the surface of the grill with a spatula, go over it with a damp cloth to remove the solubilized residue, and rinse the surface several times with a clean damp cloth.

Too hot iron would produce an evaporation that is too violent and quite annoying for the person who is applying it.

For cleaning kitchen griddles, after rinsing it is advisable to apply vinegar or lemon on the treated surface to remove all product residue. Do not use on aluminium or painted surfaces.

### Properties

High-concentration product is capable of cleaning traces of carbonized grease in a minimum time, reducing cleaning costs and facilitating and reducing personal effort by easily removing dirt when cleaning plates, ovens and kitchen trays.

With a high solvent and humectant power and with a high alkali content, it transforms fats into easily soluble products, facilitating their removal on surfaces. Cleaning parts by immersion allows you to penetrate deep into corners that are difficult to access, removing the most encrusted grease.

### Characteristics

**Physical appearance:** brown liquid.

**Density:** 1,20 gr/cc. aprox.

**pH:** 13

#### COMPOSITION:

Complex mixture of glycols, sequestrants, surfactants and alkalis.

### Caution

**DANGER.** Causes severe skin burns and eye damage. May be corrosive to metals. Composition communicated to the Spanish National Toxicology Service. In accident event, consult the Toxicological Information Medical Service, Telephone +0034 915 620 420.

### Notes

Restricted to professional users. Keep container tightly closed and in a cool place. Safety data sheets available to professional users.
